SUBJECT INDEX

For page 1–180: (Proceedings of the US–Japan Joint Seminar on The High-Temperature Chemistry of Current Light-Water Reactors and of Advanced All-Metal Reactors, Tokyo, Japan, June 8–12, 1987)

Actinide 163
Alkaline-earth oxide 14
α-Zr(O) 123
Atomic absorption spectroscopy 47

Beryllium fluoride 163

Cesium iodide 47
Cesium telluride 62
Cesium vapor complexes 74
Chemical activity 3
Cladding melting 116
Convection in melts 102
Corrosion 128
CsI volatility 67
Cs_2Te 62

Degraded LWR core 62
Diffusion in melts 85
Diffusion kinetics 85

Equilibrium distribution 163
Extraction 163

Fission product release 25, 53, 67
Fission products 38
Fuel cladding 128
Fuel–cladding chemical interaction 128
Fuel liquefaction 102
Fuel rod relocation 116

Interfacial reaction 123
Interphase chemical equilibrium 169
Irradiated UO_2 fuels 67

Knudsen effusion mass spectrometry 3, 154

Lanthanide 163
Laser-flash method 141
Liquid metals 163, 169
Lithium chloride 163
Lithium fluoride 163

Mass spectrometry 67, 74
Meltdown 116
Melting temperature 38
Metal fuels 145
Metallic fuel 154
Metallic uranium 141
Metallic zirconium 141
Mo–Ru–Pd system 3
Modelling 38
Molten salts 163, 169
Molten Zircaloy 85, 102

Oxidation 128
Oxide fuel 38
Oxygen buffer 128
Oxygen concentration 123
Oxygen potential 3, 14, 62, 128

Phase diagram 3
Plutonium dioxide 14
Post-irradiation annealing 25
Pyrochemical reprocessing 169

Radiolysis 47
Rare-earth sesquioxide 14
Reaction cross-section 47
Regular solution model 3

Severe fuel damage 116
Solid solution 14
Source term study 47
Stainless steel 128
Steam-oxidation model 53

Tellurium 62
Tellurization 128
Ternary alloys 145
Thermal arrest 38
Thermal conductivity 141
Thermal diffusivity 141
Thermochemistry of Cs–O–H system 74
Thermodynamic properties 154
Thermophysical properties 145
TMI accident 53

U–Pu–Zr alloys 145
U–Zr–O ternary system 123
U–Zr–O ternary melts 85
UO_2 123

UO_2 dissolution 85, 102
UO_2–Zircaloy chemical interaction 116
Uranium dioxide 14
Uranium–zirconium alloy 141, 154

Vapor pressure 3
Vaporization 154
Volatile fission products 25

Xe, Cs, Te and I fission products 25

For page 181–358:

Computer Calculations, including Modelling
An atomic creep mechanism induced by high-energy collision cascades, V.V. Kirsanov and E.M. Kislitsina 154 (1988) 305

Constitution
$M_2U_4O_{12}$ compounds of potassium, rubidium and thallium, K.L. Chawla, N.L. Misra and N.C. Jayadevan 154 (1988) 181

Crystallographic Properties
$M_2U_4O_{12}$ compounds of potassium, rubidium and thallium, K.L. Chawla, N.L. Misra and N.C. Jayadevan 154 (1988) 181

Defects and Defect Structures
The influence of dissociation of small helium–vacancy clusters on the growth of helium bubbles, the accumulation of helium at the grain boundaries and the kinetics of helium desorption from irradiated materials, V.A. Borodin, V.M. Manichev and A.I. Ryazanov 154 (1988) 263

Diffusion *(incl. Thermodiffusion)*
A model for calculating fission gas diffusion in annealing experiments, B.J. Lewis and F.C. Iglesias 154 (1988) 228

Electron Microscopy and Electron Probe Microanalysis
The influence of helium and temperature on the microstructure of a dual-ion-irradiated Type-316 stainless steel, J.W. Muncie and D.J. Mazey 154 (1988) 204
A combined TEM and X-ray microanalytical study of argon in aluminium, R.J. Cox and P.J. Goodhew 154 (1988) 233

Fusion Reactors: Blanket Materials *(incl. Lithium)*
Swelling and outgassing of heavily-irradiated lithium hydride, P.C. Souers, F.J. Ackerman, T.J. Biel, J. Bigwood, V. Brite, L.D. Christensen, C.L. Folkers, V. Gede, C.M. Griffitth, E.B. Huss, R. Lindahl, T. McCreary, H.H. Otsuki, R.L. Pond, G.D. Snider, C. Stanhope, R.K. Stump, F. Vanderhoofven, R.T. Tsugawa, J.L. Anderson, D.W.H. Carstens, W.L. Drumhiller, W.B. Lewis, J.E. Nasise, F.E. Pretzel, E.G. Szklarz, D.T. Vier, R.C. Bowman, Jr. and A. Attalla 154 (1988) 308
Density of trapped gas in heavily-irradiated lithium hydride, R.C. Bowman, Jr., A. Attalla, P.C. Souers, C.L. Folkers, T. McCreary, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 154 (1988) 318

Fusion Reactors: Surface Effects
Carbon monoxide formation on graphite bombarded with oxygen ions, E. Hechtl and J. Bohdansky 154 (1988) 201

Gases *(excl. Tritium)* **in Metals, Alloys and Ceramics**
The influence of helium and temperature on the microstructure of a dual-ion-irradiated Type-316 stainless steel, J.W. Muncie and D.J. Mazey 154 (1988) 204
A model for calculating fission gas diffusion in annealing experiments, B.J. Lewis and F.C. Iglesias 154 (1988) 228
A combined TEM and X-ray microanalytical study of argon in aluminium, R.J. Cox and P.J. Goodhew 154 (1988) 233
The influence of dissociation of small helium–vacancy clusters on the growth of helium bubbles, the accumulation of helium at the grain boundaries and the kinetics of helium desorption from irradiated materials, V.A. Borodin, V.M. Manichev and A.I. Ryazanov 154 (1988) 263
The effects of helium implantation on microstructural evolution in an austenitic alloy, R.E. Stoller and G.R. Odette 154 (1988) 286
Swelling and outgassing of heavily-irradiated lithium hydride, P.C. Souers, F.J. Ackerman, T.J. Biel, J. Bigwood, V. Brite, L.D. Christensen, C.L. Folkers, V. Gede, C.M. Griffitth, E.B. Huss, R. Lindahl, T. McCreary, H.H. Otsuki, R.L. Pond, G.D. Snider, C. Stanhope, R.K. Stump, F. Vanderhoofven, R.T. Tsugawa, J.L. Anderson, D.W.H. Carstens, W.L. Drumhiller, W.B. Lewis, J.E. Nasise, F.E. Pretzel, E.G. Szklarz, D.T. Vier, R.C. Bowman, Jr. and A. Attalla 154 (1988) 308
Density of trapped gas in heavily-irradiated lithium hydride, R.C. Bowman, Jr., A. Attalla, P.C. Souers, C.L. Folkers, T. Mc-

Creary, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 154 (1988) 318
Swelling and gas release in UO_2 and comparisons with FASTGRASS and OGRES code predictions, A.A. Solomon, A. Casagranda and J. Rest 154 (1988) 332

Graphite and Carbon
Carbon monoxide formation on graphite bombarded with oxygen ions, E. Hechtl and J. Bohdansky 154 (1988) 201

Iron and Iron Alloys *(see Steels)*
An atomic creep mechanism induced by high-energy collision cascades, V.V. Kirsanov and E.M. Kislitsina 154 (1988) 305

Irradiation Effects *(excl. Swelling and Voids)*
Carbon monoxide formation on graphite bombarded with oxygen ions, E. Hechtl and J. Bohdansky 154 (1988) 201
A model for calculating fission gas diffusion in annealing experiments, B.J. Lewis and F.C. Iglesias 154 (1988) 228
Irradiation growth in annealed and 25% cold-worked Zircaloy-2 between 353–673 K, A. Rogerson 154 (1988) 276
An atomic creep mechanism induced by high-energy collision cascades, V.V. Kirsanov and E.M. Kislitsina 154 (1988) 305
Swelling and outgassing of heavily-irradiated lithium hydride, P.C. Souers, F.J. Ackerman, T.J. Biel, J. Bigwood, V. Brite, L.D. Christensen, C.L. Folkers, V. Gede, C.M. Griffitth, E.B. Huss, R. Lindahl, T. McCreary, H.H. Otsuki, R.L. Pond, G.D. Snider, C. Stanhope, R.K. Stump, F. Vanderhoofven, R.T. Tsugawa, J.L. Anderson, D.W.H. Carstens, W.L. Drumhiller, W.B. Lewis, J.E. Nasise, F.E. Pretzel, E.G. Szklarz, D.T. Vier, R.C. Bowman, Jr. and A. Attalla 154 (1988) 308
Density of trapped gas in heavily-irradiated lithium hydride, R.C. Bowman, Jr., A. Attalla, P.C. Souers, C.L. Folkers, T. McCreary, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 154 (1988) 318

Liquid Metals
Density and heat capacity of liquid uanium at high temperatures, R.N.R. Mulford and R.I. Sheldon 154 (1988) 268

Mechanical Properties
Heat treatment–microstructure–mechanical property relationships in U–Cr castings, M.E. McAllaster and K.H. Eckelmeyer 154 (1988) 342

Microstructure *(incl. Textures)*
The effects of helium implantation on microstructural evolution in an austenitic alloy, R.E. Stoller and G.R. Odette 154 (1988) 286
Heat treatment–microstructure–mechanical property relationships in U–Cr castings, M.E. McAllaster and K.H. Eckelmeyer 154 (1988) 342

Physical Properties
The electrical impedance of single-crystal urania at elevated temperatures, R.N. Hampton, G.A. Saunders, A.M. Stoneham and J.H. Harding 154 (1988) 245
Surface temperature transients from pulsed laser heating of UO_2, S.K. Yagnik and D.R. Olander 154 (1988) 253

Recrystallization, Recovery and Grain Growth
Heat treatment–microstructure–mechanical property relationships in U–Cr castings, M.E. McAllaster and K.H. Eckelmeyer 154 (1988) 342

Steels
Observations of void swelling in selected austenitic alloys during ion irradiation under a rising temperature ramp, D.J. Mazey, T.M. Williams and D.E.J. Bolster 154 (1988) 186
The influence of helium and temperature on the microstructure of a dual-ion-irradiated Type-316 stainless steel, J.W. Muncie and D.J. Mazey 154 (1988) 204
Void swelling in 12R72HV austenitic steel after 46 MeV Ni^{6+} irradiation to 120 dpa in the Harwell VEC, R.M. Deakin and D.J. Mazey 154 (1988) 219
The effects of helium implantation on microstructural evolution in an austenitic alloy, R.E. Stoller and G.R. Odette 154 (1988) 286

Swelling
Void swelling in 12R72HV austenitic steel after 46 MeV Ni^{6+} irradiation to 120 dpa in the Harwell VEC, R.M. Deakin and D.J. Mazey 154 (1988) 219
Swelling and outgassing of heavily-irradiated lithium hydride, P.C. Souers, F.J. Ackerman, T.J. Biel, J. Bigwood, V. Brite, L.D. Christensen, C.L. Folkers, V. Gede, C.M. Griffitth, E.B. Huss, R. Lindahl, T. McCreary, H.H. Otsuki, R.L. Pond, G.D. Snider, C. Stanhope, R.K. Stump, F. Vanderhoofven, R.T. Tsugawa, J.L. Anderson, D.W.H. Carstens, W.L. Drumhiller, W.B. Lewis, J.E. Nasise, F.E. Pretzel, E.G. Szklarz, D.T. Vier, R.C. Bowman, Jr. and A. Attalla 154 (1988) 308
Swelling and gas release in UO_2 and comparisons with FASTGRASS and OGRES

code predictions, A.A. Solomon, A. Casagranda and J. Rest 154 (1988) 332

Thermodynamic Properties
Density and heat capacity of liquid uanium at high temperatures, R.N.R. Mulford and R.I. Sheldon 154 (1988) 268

Thermophysical Properties
Surface temperature transients from pulsed laser heating of UO_2, S.K. Yagnik and D.R. Olander 154 (1988) 253

Uranium and Uranium Alloys
Density and heat capacity of liquid uanium at high temperatures, R.N.R. Mulford and R.I. Sheldon 154 (1988) 268
Heat treatment–microstructure–mechanical property relationships in U–Cr castings, M.E. McAllaster and K.H. Eckelmeyer 154 (1988) 342

Uranium Ceramics
The electrical impedance of single-crystal urania at elevated temperatures, R.N. Hampton, G.A. Saunders, A.M. Stoneham and J.H. Harding 154 (1988) 245
Surface temperature transients from pulsed laser heating of UO_2, S.K. Yagnik and D.R. Olander 154 (1988) 253
Swelling and gas release in UO_2 and comparisons with FASTGRASS and OGRES code predictions, A.A. Solomon, A. Casagranda and J. Rest 154 (1988) 332

Void Formation
Observations of void swelling in selected austenitic alloys during ion irradiation under a rising temperature ramp, D.J. Mazey, T.M. Williams and D.E.J. Bolster 154 (1988) 186
Void swelling in 12R72HV austenitic steel after 46 MeV Ni^{6+} irradiation to 120 dpa in the Harwell VEC, R.M. Deakin and D.J. Mazey 154 (1988) 219

Zirconium, Zirconium Alloys and Compounds
Irradiation growth in annealed and 25% cold-worked Zircaloy-2 between 353–673 K, A. Rogerson 154 (1988) 276
